

Meet TINKER!

Can we say beyond ADORABLE? It's hard to find a better adjective for **TINKER!** Just take a look at the pictures of this little girl and try to come up with a better description. The photos speak for themselves... and check out Tinker's special marking of a question mark on her back!

GCCR received a call in August from a rescuer in Hancock County, IL, after a breeder had given her Tinker – then a 3-month-old Tricolor Cavalier who weighed less than 3 pounds suffering from an audible upper respiratory infection, severely luxating knees, and parasites. GCCR's vet immediately placed Tinker on an effective antibiotic that is used on many mill dogs with positive results. Tinker, everyone at GCCR is so glad you are on your way to a happy and healthier life.

Tinker was placed as a “foster with intent” with one of GCCR's longtime Cavalier lovers, Peggy, in Yorkville. After some quality time with her fellow pals at Peggy's home (including her 2 Cavaliers, Maddie and Mollie, her Lhasa Apso Sammy, and Lola, their long hair Chihuahua and self-appointed “mom”), Tinker now has settled into her forever home with lots of love, cuddles, and companionship.

Eventually, when Tinker gets a little bigger, she'll have surgery on her knees and be spayed; then her adoption can be finalized. Tinker continues to thrive and enjoys running off all that puppy energy! Many thanks to Peggy for taking in another ADORABLE rescue from GCCR--TINKER!

Adorable!

After being told Tinker looks good in pink, Peggy replied "She looks good in all the colors!" We couldn't agree more!
