

## *SYRINGOMYELIA (SM)*

### *MRI CLINICS*

SM (syringomyelia) is a debilitating and painful disease affecting many Cavaliers. It can only be definitively diagnosed by an MRI. The normal cost of an MRI is in the neighborhood of \$1300 depending on blood work, etc. With a group of five or more dogs, Dr. Michael Podell, at the Chicago Veterinary Emergency and Specialty Center at 3123 N. Clybourn Ave., Chicago, may be willing to put together a clinic with significantly discounted costs. Linda Baird schedules these clinics for the Chicago area. You can reach her at [lynwoodstudio@yahoo.com](mailto:lynwoodstudio@yahoo.com) for dates and further information. The clinic has a website at: [www.chicagoveterinaryemergency.com](http://www.chicagoveterinaryemergency.com).
